EURISCO progress report

(April 2014 – April 2018)

15th Steering Committee meeting, 15–17 May 2018, Thessaloniki, Greece

Stephan Weise

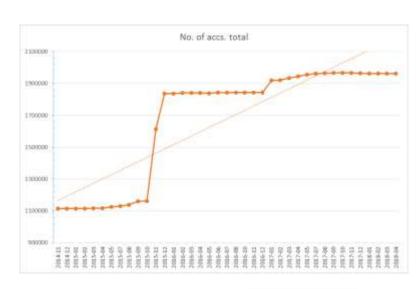

CURRENT STATUS OF EURISCO

Contents of EURISCO

- 1,961,985 accessions
- 6,317 genera (including synonyms, spelling variants)
- 42,974 species names (unique combinations genus + species, including synonyms)
- 418,679 MLS accessions
- 34,364 AEGIS accessions
- 22,906 DOIs

Taxonomic composition

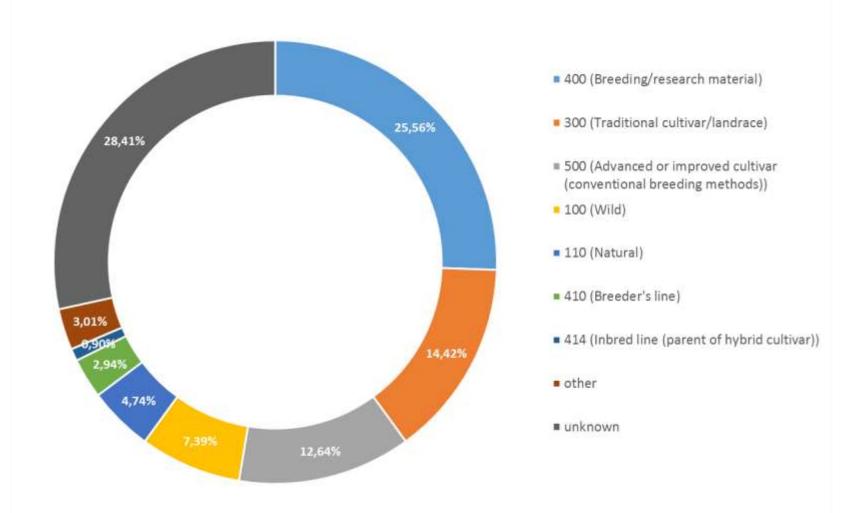

Copus	Species	No. accs.	Total
Genus	Species		
Arabidopsis	thaliana	681,983	682,191
	others	208	
Triticum	aestivum	136,778	189,104
(wheat)	durum	16,312	
	turgidum	9,601	
	monococcum	3,483	
	spelta	3,202	
	others	19,728	
Hordeum	vulgare	104,374	121,589
(barley)	spontaneum	5,897	
	others	11,318	
Zea	mays	61,715	61,849
(maize)	others	134	
Phaseolus	vulgaris	46,621	52,179
(garden bean)	coccineus	3,064	
	others	2,494	

Genus	Species	No. accs.	Total
Solanum	lycopersicum	19,152	51,265
(tomato, potato,	tuberosum	14,591	
eggplant, etc.)	andigenum	2,814	
	melongena	2,119	
	others	12,589	
Avena	sativa	33,274	41,299
(oat)	sterilis	2,152	
	byzantina	1,968	
	others	3,905	
Malus	domestica	24,759	31,875
(apple)	others	7,116	
Pisum	sativum	27,417	30,455
(pea)	others	3,038	
Vitis	vinifera	26,096	30,049
(grape)	others	3,953	
others			670,130
		Total	1,961,985

Biological status

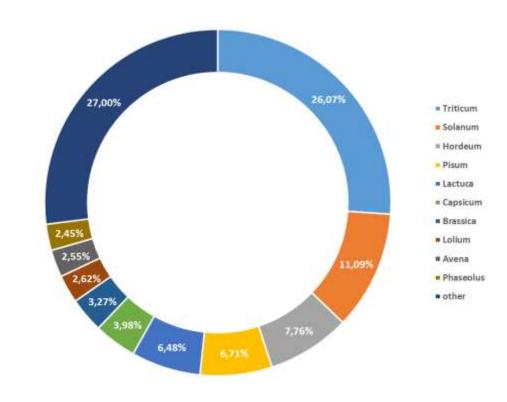

C&E data

- Currently, 1,652,895 records of data from seven countries
 - Czech Republic
 - Germany
 - Latvia
 - The Netherlands
 - Poland
 - Romania
 - United Kingdom

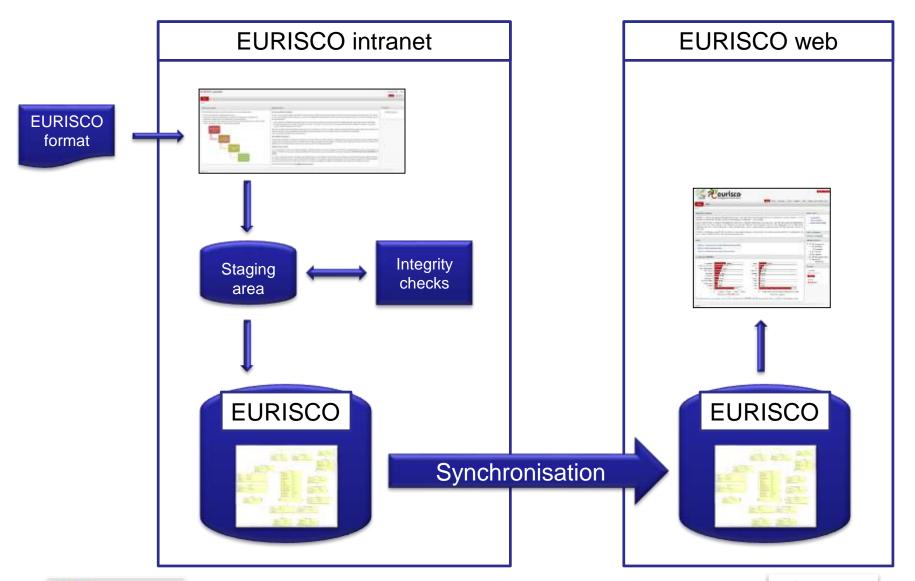

68,821 accs. with C&E data

Architecture: Overview

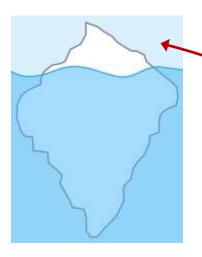

Architecture: DB schema features

- EURISCO intranet
 - 59 tables
 - 502 indexes
 - 108 triggers
 - 14 PL/SQL packages
 - 177 function and procedures
 - data upload and import
 - integrity checks
 - updates (passport and C&E)
 - taxonomy support
 - 27 Java classes

- EURISCO web
 - 46 tables
 - 29 materialised views
 - 698 indexes
 - 9 PL/SQL packages
 - 38 function and procedures
 - download
 - newsletter
 - statistics
 - C&E data visualisation
 - AEGIS status auditing
 - taxonomy support
 - In-memory features
 - 4 Java classes

EURISCO: The European search catalogue for plant genetic resources

Stephan Weise^{1,*}, Markus Oppermann¹, Lorenzo Maggioni², Theo van Hintum³ and Helmut Knüpffer¹

¹Leibniz Institute of Plant Genetics and Crop Plant Research (IPK) Gatersleben, Corrensstr. 3, 06466 Stadt Seeland, Germany, ⁹Bioversity International, Via del Tre Denari 472/a, 00057 Maccarese (Flumicino), Rome, Italy and ⁹Centre for Genetic Resources, The Netherlands (CGN), Wageningen University and Research Centre, P.O. Box 16, 6700 AA Wageningen, The Netherlands

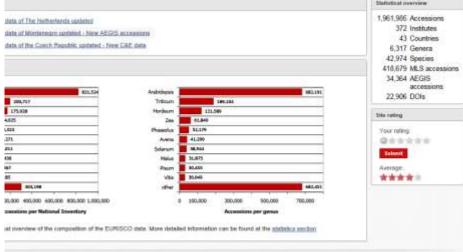

Received July 28, 2016: Revised August 19, 2016: Accepted August 21, 2016

ABSTRACT

The European Search Catalogue for Plant Genetic Resources, EURISCO, provides information about 1.8 million crop plant accessions preserved by almost 400 institutes in Europe and beyond. EURISCO is being maintained on behalf of the European Cooperative Programme for Plant Genetic Resources, it is based on a network of Millional Inventories of 42

typic characterisation of genebank accessions, i.e. collecting information about traits such as disease resistance, drought tolerance and yield components. These data are usually generated on selected material, resulting in non-orthogonal, highly incomplete data sets. Nevertheless, the analysis of these data allows meaningful results, e.g. the identification of promising new alleles (5). Around the world, there are about 1800 genebank collections conserving PGRFA.

Thereof, about 675 collections are maintained in Furnare

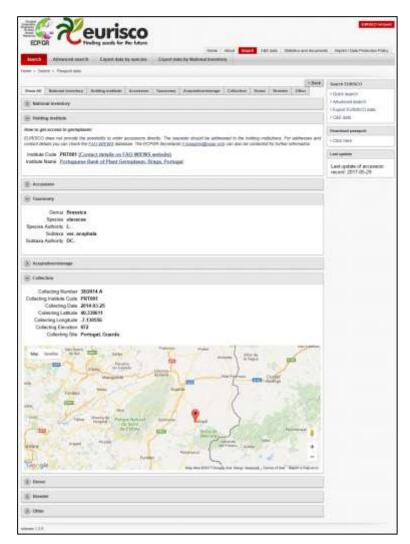

39 (sub)versions since 2014

Passport data in EURISCO

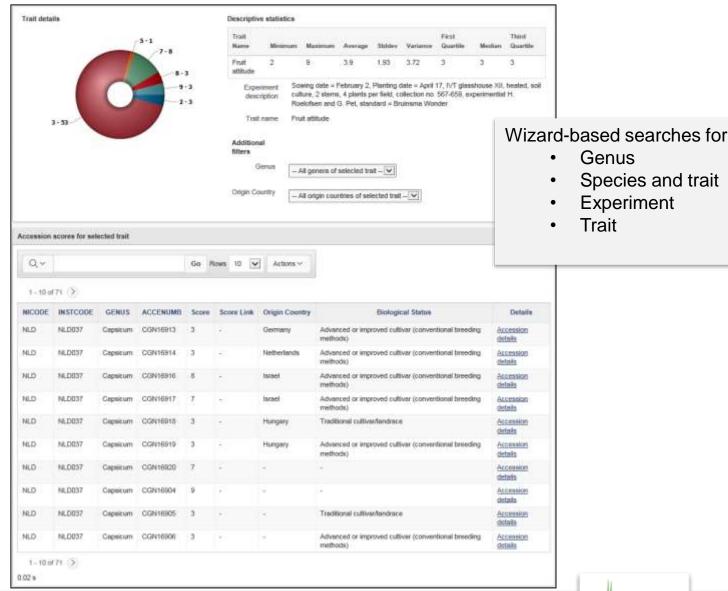

- Four standard searches:
 - Taxonomy
 - Accession
 - Biological status
 - Collecting site
- Advanced search
- Different user-specific export features

C&E data in EURISCO

Genus

Trait

Species and trait

Experiment

Version history of the web interface

v1.1.0

 New export functionality + download of full dump

(Nov. 2014)

- v1.1.1 v1.1.17 (2015 - 2016)
- continuous improvements

v1.2.0

- C&E data extension; new export functionalities: new advanced search; lots of small improvements
- v1.2.1 v1.2.7 (2016 - 2017)continuous improvements

v1.4.0(planned for v1.3.0 Jun. 2018) (Dec. 2017)

- Migration to MCPD2; increased usability; reworked lots of small
- v1.3.1 v1.3.5 (2018) continuous improvements

improvements

 Taxonomy search completely

v1.0.0 (Oct. 2014)

- First public version
- v1.0.1 v1.0.6continuous improvements

NEW HOSTING OF EURISCO

EURISCO transfer

- Preparation of transfer (2013)
 - Preparatory meetings
 - High costs for transfer of as-is status
 - → New development from scratch
 - Analysis of the former web application
- System reengineering and data migration
 - Frontend reengineering (public EURISCO application)
 - Database structures and public web application
 - PL/SQL for functionality; APEX for rendering
 - Backend reengineering (EURISCO intranet)
 - Database structures and intranet web application
 - PL/SQL for functionality; APEX for rendering
 - Import (and cleansing) of current data set
 - Migration path MySQL → Oracle RDBMS

- EURISCO intranet
 - EURISCO transfer (main task)
 - Switch to new upload mechanism (incremental updates)
- Public EURISCO application
 - EURISCO transfer (main task)
 - New export feature with customised export files in CSV format

- EURISCO intranet
 - Java-based passport importer developed
 - Data quality/integrity checks improved
 - AEGIS status tracking
- Public EURISCO application
 - Statistics section with various reports
 - Improved search functionality (additional fields/filters)
 - Adjustments "under the hood"
- Extension for C&E data
 - Data exchange format
 - Database schema
 - Upload and check mechanism
 - Public web interface (prototype; continued in 2016)

- EURISCO intranet
 - Interface extended for importing C&E data
 - AEGIS support as well as quality/integrity checks improved
- Public EURISCO application
 - Additional export functionalities implemented
 - Advanced search completely reworked
 - Extended performance tuning
- Extension for C&E data
 - Public web interface extended for C&E and tested
 - Additional features implemented (based on users' feedback)
 - Productive data imported
 - Official release of C&E extension

- EURISCO intranet
 - AEGIS support improved further
 - Improvement of taxonomy support started (continued in 2018)
 - Database structures and mapping procedures
 - How-to-documents (handbooks) compiled
 - Implementation of MCPD2 for EURISCO
 - Database structures, upload and check procedures
- Public EURISCO application
 - User survey conducted and requirements for improvement collected
 → addressed all NCs/NFPs; received useful suggestions
- Extension for C&E data
 - Additional flexible procedure for uploading C&E data compiled and implemented → delegation and final approval by NFPs

Outcomes 2018 (ongoing)

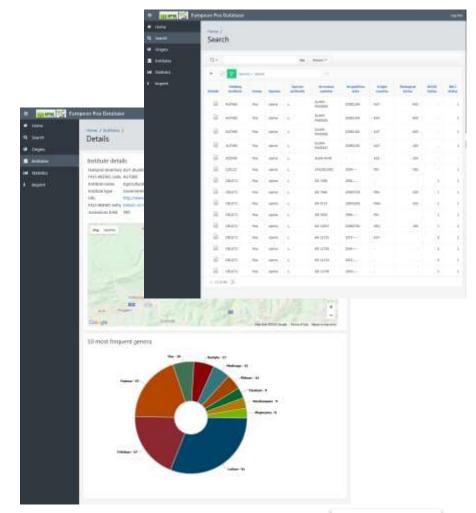

- EURISCO intranet
 - Improvement of taxonomy support (started in 2017)
- Public EURISCO application
 - Implementation of requirements from user survey
 - Extension for SSR data (under evaluation)
- Extension for C&E data
 - Improvement of search and download features

Support of ECPGR Central Crop Databases

- Cooperation with various crop WGs
- Example: European Poa Database (Forage WG)
- poa.ipk-gatersleben.de (hosted at IPK since the 1990s)
- Blueprint for a crop portal automatically updated from EURISCO

EURISCO COORDINATION

Network maintenance + development

- Contact with EURISCO stakeholders
- Definition of new services, e.g. with regard to DOIs
- Advancement of current and definition of new standards
- Coordination with initiatives such as Genesys and GLIS
- Bilateral communication with regard to the coverage of EURISCO
- Cooperation with ECPGR Working Groups
- Preparation of work plans and reports
- Helpdesk behind the scenes (should not be underestimated ;-))

Passport data updates

Year	No. of updates	Accs. total
2014	1	1,114,995
2015	28	1,837,368
2016	25	1,842,539
2017	55	1,964,062
2018 (as at 2018-04-25)	12	1,961,985

EURISCO training workshops

- Regular training for data providers (esp. for C&E data and in case of staff changes)
- Training materials + test environment developed + meeting reports
- Annual workshops:
 - 2015 Tirana, Albania (Agricultural University of Tirana)
 - 20 participants
 - 2016 Angers, France (INRA)
 - 13 participants
 - Meeting of the EURISCO Advisory Committee
 - 2017 Gatersleben, Germany (IPK)
 - 14 participants
- 2018 training under preparation

Participation in project proposals

- Involved in various ECPGR Grant Scheme Activities
- EURISCO Taxonomy (ECPGR, BLE), 2017–2018
 - Improvement of taxonomic backbone of EURISCO
- EUCLEG (Horizon 2020), 2017–2021
 - Coordination: INRA, France
 - Aim: reduction of protein import dependencies of both European and Chinese partners
 - Leader of work package for data management
 - Find data gaps in EURISCO (and try to close them)
 - Manage project data (passport, phenotypic, genetic)
- Farmer's Pride (Horizon 2020), 2018–2020
 - Coordination: University of Birmingham, U.K.
 - Aim: Development of network of in situ sites and stakeholders
 - Task leader: Preparation of a concept to extend EURISCO for in situ data
- Participation in the proposal "GenRes Bridge Joining forces for genetic resources and biodiversity management"

Dissemination

- Regularly short information in ECPGR bulletin
- EURISCO newsletter twice a year
- Journal article
- EURISCO talks and posters at several conferences
- Presentations at several ECPGR workshops
- ECPGR Grant Scheme Activities

FUTURE OF EURISCO

EURISCO: Plans & challenges

- ECPGR Phase X (2019–2023)
 - Further development in close collaboration with ECPGR bodies
 - Specific focus on:
 - Phenotypic data
 - Harmonisation of traits
 - Implementation of additional use-cases
 - In situ data
 - Extension of EURISCO
 - Data quality
 - Completeness
 - Reliability, e.g. geographic coordinates
 - Continuous improvement of functions and services

THANK YOU FOR YOUR ATTENTION
