

Cryopreservation activities in Belgium

Bart Panis

Importance of banana/plantains/cooking bananas

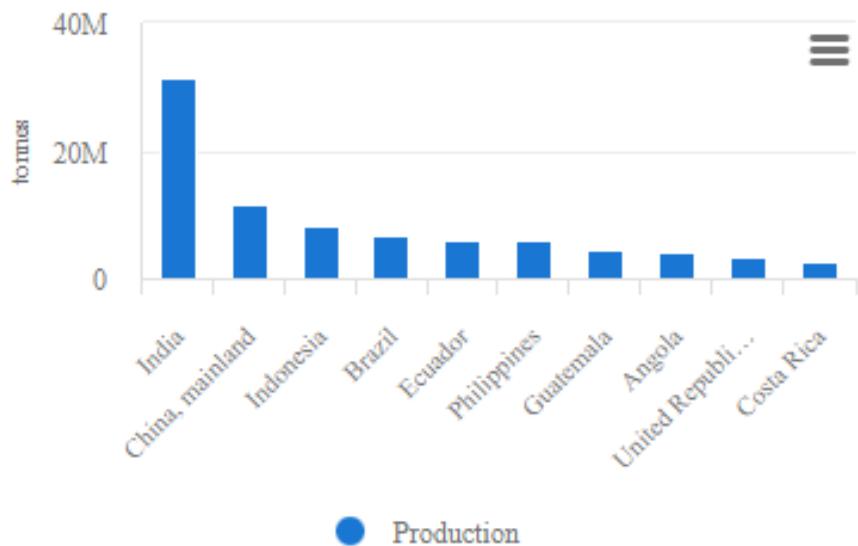

- Staple food for **400-1,000 million** people
- Produced in **>120** countries
- Banana and plantain (*Musa* spp.): Largest fruit crop in the world with an annual production of **158 million tonnes** (2020, FAO)(Apple: 87 million tonnes)
- International banana trade: yearly turnover of **~6 billion USD**

Production

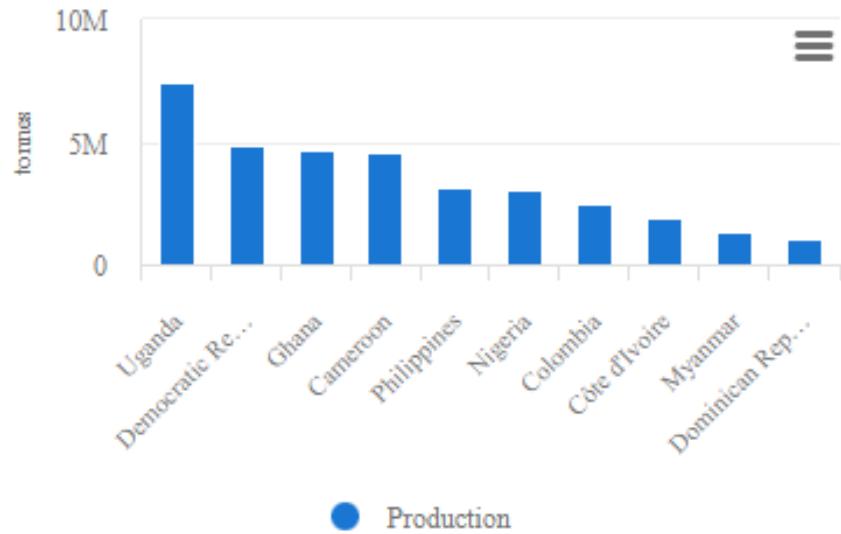

Production of Bananas: top 10 producers

2020

Production of Plantains and cooking bananas: to...

2020

Alliance

Problems in banana cultivation

Diseases (viral, fungal, bacterial, nematodes, insects).

- TR4 attacking the export banana worldwide
- BBTV threatening plantain production

Stress due to climate change

- Storms
- Drought

Fruit

- Shelf life
- Fruit quality
- Yield

Where do “new cvs” or “characteristics have to come from?

1. Forgotten cvs
2. Classical improvement
3. Modern improvement

Access to the widest possible genetic diversity is essential

The banana world collection in Leuven, Belgium

- Established in 1985 at KU Leuven, Belgium
- Food and Agriculture Organization of the UN 'in trust' collection (1994)

Cryopreserved base
collection 1195 accessions

In vitro active collection
1682 accessions

Lyophilized leaf tissue collection
939 accessions

Off site black box safety back-up
(IRD, France) 996 accessions

Germplasm health testing

→ FAO International Guidelines for the safe movement of *Musa* germplasm –
1989/1996
Methodologies

1/ Pre-indexing

Testing of accession lines grown in screenhouse at 3 months

Specific tests :

PCR for BBTV/CMV/BBrMV/BSVs/BanMMV

2/ Virus therapy

| | CMV | BBTV | BSV | BanMMV |
|------------------|-----|------|-----|--------|
| Meristem culture | - | +++ | ++ | |
| Thermotherapy | +++ | | | +++ |
| Chemotherapy | + | | +++ | + |
| Electrotherapy | - | | +++ | |
| Cryotherapy | + | | +++ | |

3/ VIC indexing

Testing of accession subset of TC plantlets grown in screenhouse at 3 and 6 months

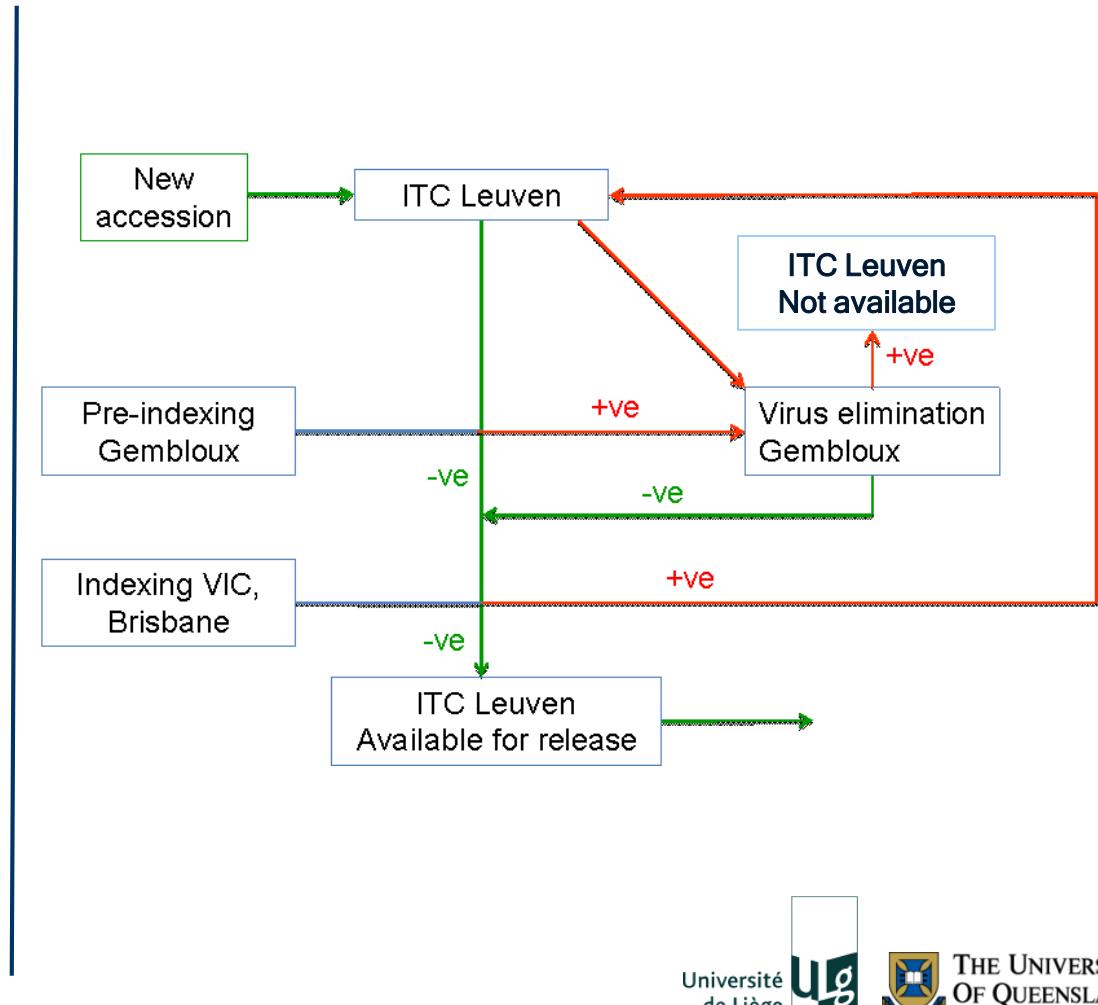

Specific tests (knowns) :

Multiplex PCR for BBTV/CMV/BBrMV/BSVs
PCR for BanMMV

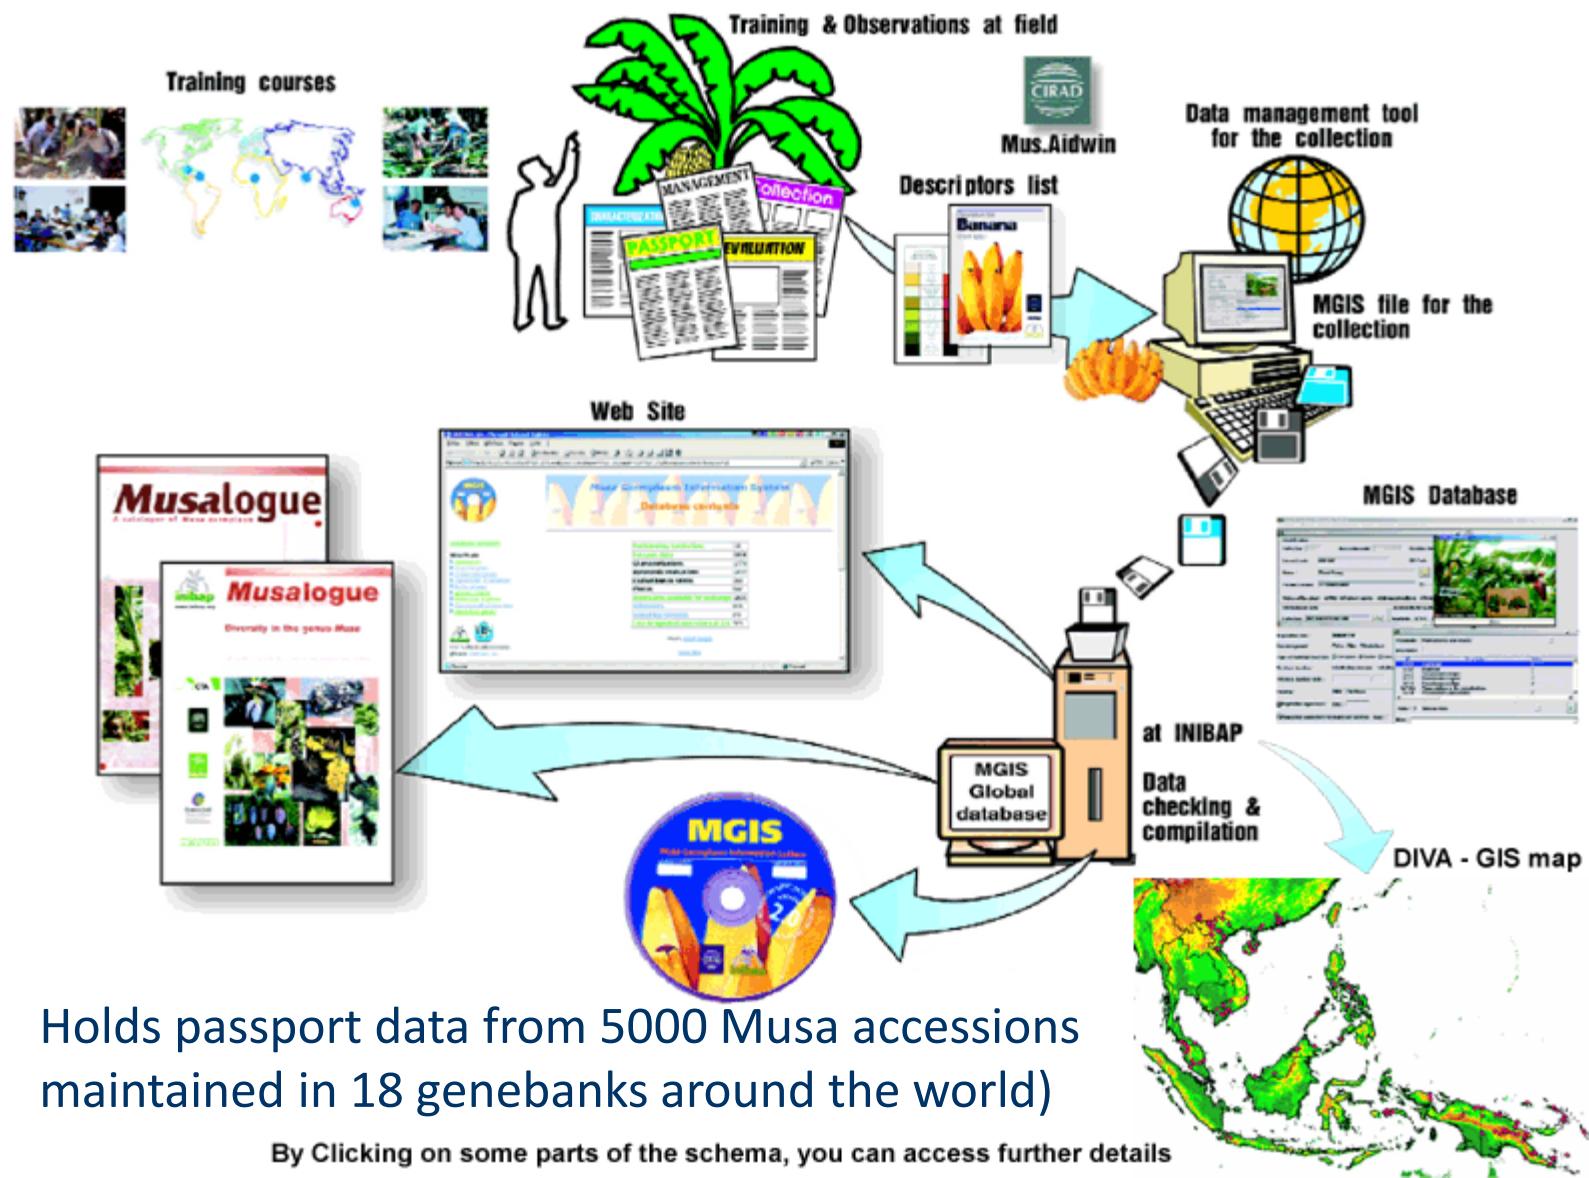

ISEM

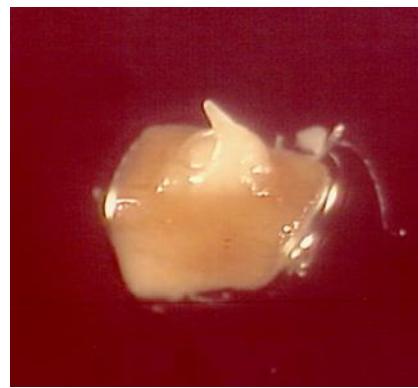

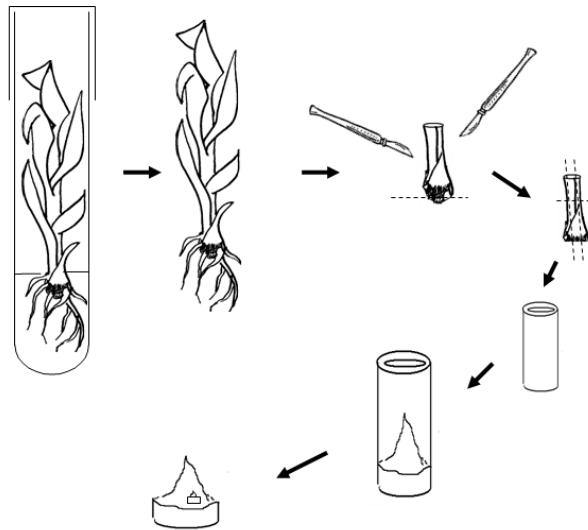

Non-specific tests (unknowns) :

Visual inspection for symptoms
Minipreps/EM

Musa Germplasm Information System (MGIS)

Development of protocols

- **Potato** (CIP, Peru; CRPGL, Luxemburg; VIR, Russia)
- **Ulluco** (CIP, Peru)
- **Sweet potato** (CIP, Peru)
- **Chicory** (CRA, Gembloux, Belgium)
- **Strawberry** (CRA, Gembloux, Belgium)
- **Taro** (SPC, Fiji)
- **Pelargonium** (INH, Angers, France)
- **Date Palm** (Université de Sfax, Tunesia)
- **Banana** (CIRAD, France; NBPGR, India)
- **Thyme** (Univ Alicante, Spain)
- **Olive** (IFAPA, Malaga, Spain)
- **Hop** (Univ Oviedo, Spain)
- **Photinia** (CNR, Firenze, Italy; Gebze, Turkey)
- **Vitis** (CNR, Palermo, Italy, PFR, Palmerston, NZ)
- **Apple** (Fruit Tree Research Institute, Italy)
- **Cassava** (IITA, Nigeria, CIAT, Colombia)
- **Tomato** (University of Valencia, Spain)
- **Bituminaria** (University of Valencia, Spain)
- **Narcissus** (Daffodil) (University of Krakow, Poland)
- **Galanthus** (Snowdrop) (University of Krakow, Poland)
- **Lily** (PRI, the netherlands)
- **Rose** (University of Krakow, Poland)
- **Yacon** (University of Prague, Czech republic)
- **Coconut** (RDA, South Korea)
- **Spuce** (Slovac acedemy of science)
- **Pine** (Slovac acedemy of science)
- **Ash** (CNR, Firenze, Italy)
- **Byrsonima** (UFLA, Brasil)
- **Callerya** (INTAS , China)
- **Stevia** (KU Leuven)
- **Raspberry** (FTRI, Italy)

Crymcept workshops

Workshops on Cryopreservation in Support of the Conservation of European Plant Genetic Resources

Organized by the International Plant Genetic Resources Institute (IPGRI) (Rome, Italy) in collaboration with the partners of the CRYMCEPT project:
Katholieke Universiteit Leuven, Leuven, Belgium
University of Abertay Dundee, Dundee, UK
University of Derby, Derby, UK
Institut de Recherche pour le Développement, Montpellier, France
Fruit Tree Research Institute, Rome, Italy
DSMZ-Deutsche Sammlung von Mikroorganismen und Zellkulturen GmbH,
Braunschweig, Germany

Sponsored by the European Union Project mission

Venues and dates:

The First Workshop will be hosted by the Katholieke Universiteit Leuven (Leuven, Belgium), 12–22 September 2005.

The Second Workshop will be hosted by the Institut de recherche pour le développement (Montpellier, France), 10–21 October 2005.

Action 871: Cryopreservation of crop species in Europe

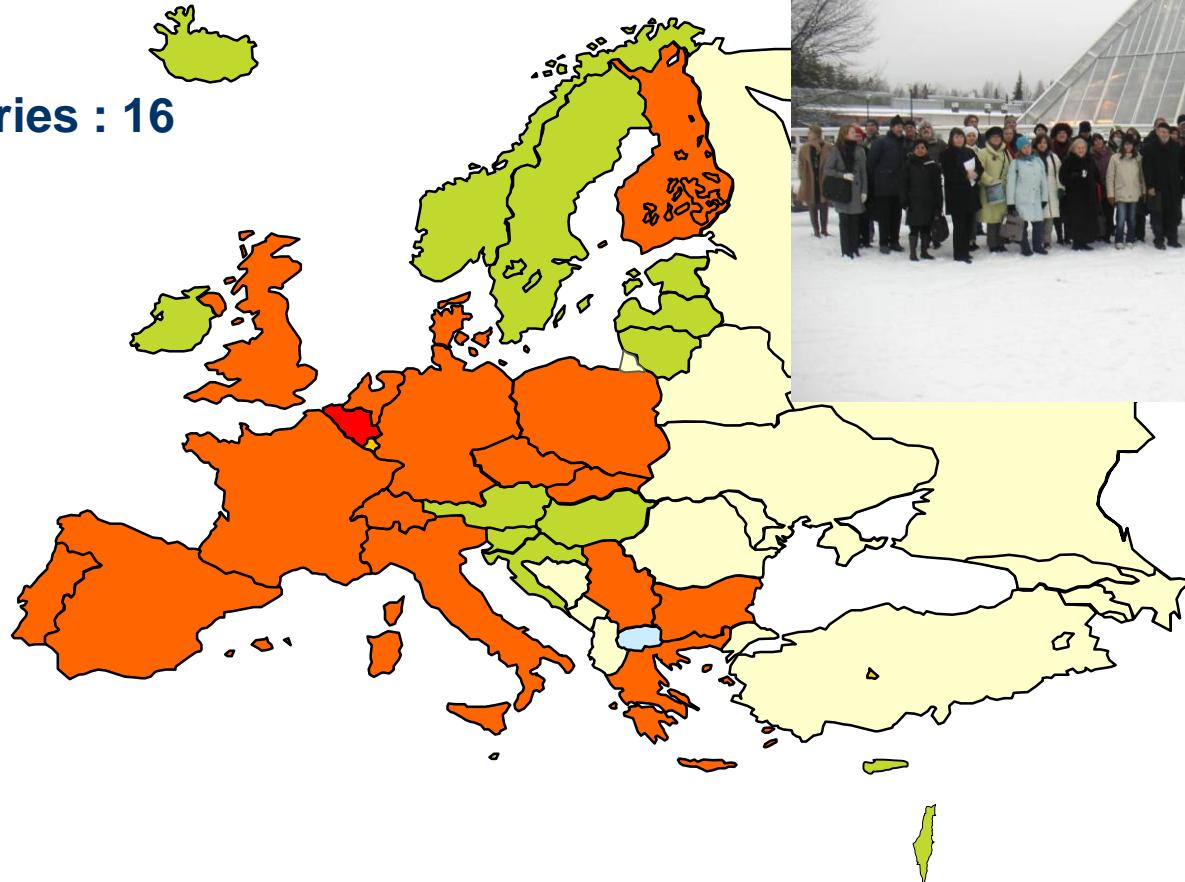

Participating Countries : 16

Chair : BE

BG, CZ, DK, FI, FR, DE,
IT, NL, PL, PT, CS, SK,
ES, UK, GR, LU, CH

Non-COST:
Vavoliv, Russia
New Zealand
Tunisia

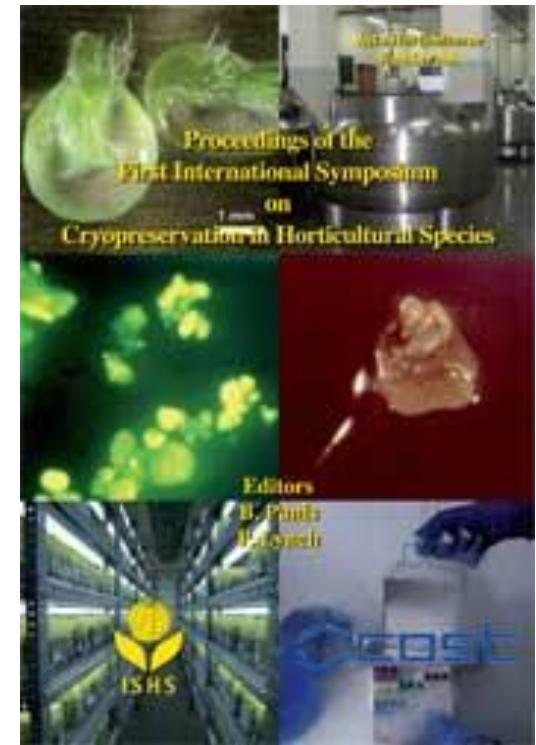

Duration: 4 years

Alliance

The first International Symposium on Cryopreservation in Horticultural Species was held in Leuven (5 to 8 April, 2009)

149 participants from 43 countries

Acta Horticulturae 908, 65 articles, 511 pages

Training on plant cryopreservation

- Over the past 25 years about 140 researchers from 44 countries were trained on plant cryopreservation techniques in Leuven.
- The length of their training ranged between 3 days and 1 year and they were financed by different sources (FWO, World Bank, EU, Development cooperation,....).

Other Cryopreservation activities in Belgium

- Cryopreservation of azalea (ILVO)
- Cryopreservation of *Abies nordmanniana* (CRA-W)
- Cryopreservation of chicory meristems and chicory seeds (Plantenteelt, KU Leuven)
- Cryopreservation hairy root cultures of *Maesa lanceolata* and *Medicago truncatula* (U GENT)
- Cryopreservation of Stevia (Plant Physiology Lab, KU Leuven)
