

## Draft Agenda

### ECPGR Workshop on Genebank Metrics

Prague, 24-25 February 2026  
*(exact timing and locations will follow)*

Objective: As a next step towards broad adoption of universal genebank metrics, the metrics will be presented, discussed and, where possible, improved by a group of documentation specialists with hands-on experience in genebank documentation. Where possible, steps towards adoption will be made.

## Agenda

### Tuesday 24 February

The first day will be dedicated to the full understanding and improvement of the metrics

#### Morning

Presentation and discussion of the concept of the metrics:

- Concept of Genebank Metrics (**Theo van Hintum**)
- Application of Genebank Metrics at CGN and IPK (**Theo van Hintum & Stephan Weise**)
- Relation of the proposed metrics to other related metrics systems (**Matija Obreza**)
- Potential application of the metrics in reporting systems (**all**)
- Use of the metrics in EURISCO and Genesys (**Stephan Weise & Matija Obreza**)
- The process towards broad adoption including implementation in GRIN-Global Community Edition (GGCE) (**all**)

#### Afternoon

Discussion of the individual metrics.

- Each metric – concept, interpretation, improvements (**Filippo Guzzon & Theo van Hintum**)  
**Filippo Guzzon & Theo van Hintum** present the metrics one by one (or by cluster) and the documentation specialists reflect based on their local systems.

## Wednesday 25 February

During the second day, the relationship between the genebanks, their documentation systems and the metrics will be made: what does it take to implement them?

### Morning

Genebanks, Documentation Systems, and Genebank Metrics.

- Brief description of my genebank, our documentation system and the possibility to implement the metrics (one presentation for each documentation specialist)

### Afternoon

Hackathon, work on the systems.

- Metrics are implemented or plan for implementation is made for each participating genebank (each documentation specialist)
