## French trial station specializing in fruits and vegetables

## 3 trials stations, 10+species worked on

#### The straight of the network

IRFEL pour Innovation et Recherche en Fruits et Légumes

French Association of fruit and vegetable regional experimental centers

A network of skills on applied science for the growers and fruit and vegetable sector 15 experimental centers directly in the production areas

Searching and finding solutions to the technical questions of the growers

## Un réseau de compétences en recherche appliquée au service des producteurs et des filières fruits et légumes

#### Strawberry: support tools for breeding program / fondamental research

#### **Genetic Ressources**

Management of the genetic resources:

For breeding purposes For genetic preservation

Old and new variety From late 1900's to actual Form all the continent

#### **Maintenance**

Maintenance of the Mother Plant commercial variety (Invenio's and others)

Production of certified runner tips for the production (vitroplant)

**Quality control** of the vitroplant

#### In vitro Lab

Production of commercial plants

Production of plant for the breeding program (virus free plant : sanitation)

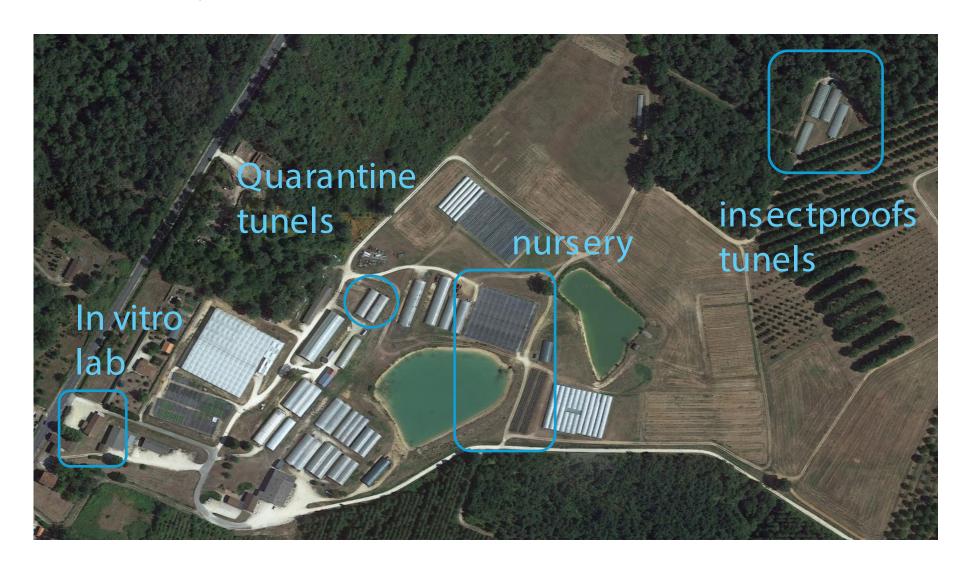

In vitro plant conservatory

In France: wild strawberry collection: INRAE / cultivated: INVENIO

## Strawberry: facilities

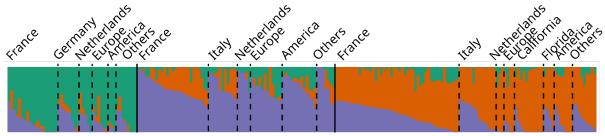

#### Conservatory of genetic resources

#### **Collection of more than 450 genotypes:**

- Old / commercial varieties : large diversity
- Genotypes stock from breeding program

#### In vivo varietal maintenance

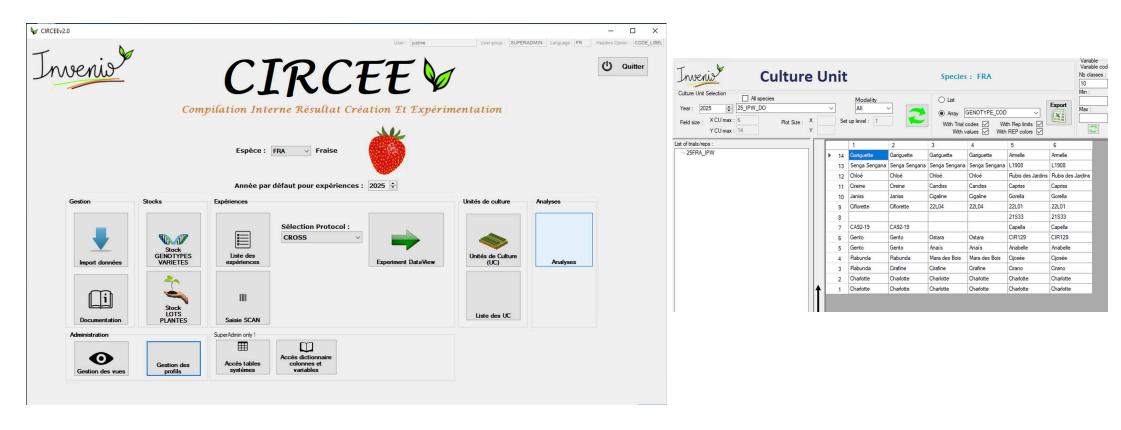

- Around 50 varieties
- Protected and unprotected commercial varieties
- Controlling and maintaining the characteristics of each variety
- Certified condition allowing to use the plants for micropropagation in our lab.

### Database ...under construction

Not publicly accessible

#### Projects (more recent one)

- BREEDING VALUE: more the 200 cultivars genotype and phenotype
- SENTINELLE: (French ministry of agriculture): 100 accessions virus tested / officially recognize as manager of national collection
- REGIONAL project (New Aquitaine region): characterization (phenotype) of old genetic resources in new cultivation system (sol less – glass green house)

Mostly for the management of the genetic resource: self founded

# Thank You
