## Table layout

### Columns 2 and 3

Latin name according to *Flowering Plants and Pteridiophytes of Poland. A Checklist* (2002) and according to *The Plant List* (TPL, 2020)

### Column 4

Latin family name according to *Flowering Plants and Pteridiophytes of Poland. A Checklist* (2002) and according to *The Plant List* (TPL, 2020)

### Column 5

Relative's rank according to the species' membership in a specific taxonomic category (Maxted et al., 2006)

1a – crop taxon, 1b – same species as crop, 2 – same series or section as crop, 3 – same subgenus as crop, 4 – same genus as crop, 5 – same tribe but different genus as crop

### Column 6

Affiliation of species to different utility categories

### Column 7

Number of stations of individual species according to Zarzycki et al. (2002)

1 – very small number of stations (up to several dozen), 2 – small number of stations (up to 100), 3 – large number of stations, but mainly in one region, 4 – large number of stations in many regions, 5 – common throughout Poland.
